Certificate of Nursery Inspection.

No. 205.

Columbus, Ohio, Aug. 25, 1903.

This is to Certify that the growing nursery stock and premises of Cozaddale Nursery, C. Franz & Sons, Props, situated near Cozaddale, Warren County, Ohio, has been inspected by authority of an act passed by the General Assembly of Ohio, May 10, 1902, and that no indications have been found of the presence of San Jose scale, black knott, peach yellows, or other dangerously injurious insects or plant diseases on such stock or premises.

This certificate is void after September 15, 1904.

A. F. BURGESS,
Chief Inspector.

TO OUR FRIENDS AND PATRONS.

It is with pleasure that we present you our Semi-Annual Catalogue, and wish to thank our customers for their hearty recommendations and liberal patronage which has resulted in a steady and constant increase in our business. We appreciate this, and assure our customers we shall always endeavor to merit their patronage and support by supplying them with the very best that can be grown. Our efforts have been appreciated by our many customers and we are now better equipped than ever before with a complete list of varieties grown on good soil, well rooted. Our best efforts will be devoted to please you.

This Catalogue has been prepared with great care. The selection of varieties embraces all the latest and most promising introductions, as well as the most popular and thoroughly proved older sorts. It will, we think, form a most efficient and competent guide to the professional or the amateur, in the selection of the Choicest Fruits or Ornamentals, for the Orchard, Park or Lawn.

Our soil being of a character best suited to produce the healthiest conditions of growth, that solid, firm texture of the wood, with abundant fibrous root, so necessary to successful transplanting, we are enabled to offer the products of our Nurseries, with entire confidence, to planters in all sections of the country.

ADVICE TO CORRESPONDENTS.

1. It is advisable to send in your orders early, particularly if long transportation is necessary.
2. Write your orders plainly on a separate piece of paper, and not in body of letter. State definitely varieties, age, size and number.
3. All orders from unknown parties should be accompanied by cash or satisfactory reference.
4. We are in no case responsible for loss or damage to goods in transit. Our responsibility ceases on delivery to shipping agents.
5. If selection of varieties is left to us we will select according to our best judgment and long experience.
6. In case of any mistake on our part, immediate notice should be given so that it may be rectified or explained.

HOW TO REMIT.

Remit by Registered Letter, Postoffice Money Order, Express Money Order on Cozaddale.

SAN JOSE SCALE.

The San Jose Scale has never been found on or near our Nurseries. We furnish with each shipment a copy of Certificate of Nursery Inspection.

We solicit correspondence and invite personal inspection of our stock.

CONDITIONS.

While we exercise the greatest care to have all trees, shrubs and plants genuine and reliable, we hold ourselves prepared to replace, upon proper proof, all that may prove untrue. We do not give any warranty, express or implied, and in case of any error on our part, it is mutually agreed between the purchaser and ourselves that we shall not at any time be held responsible for a greater amount than the original price of the goods.

WINTER.

✓ **Ben Davis**—Large, handsome, striped, productive, a late keeper. Tree remarkably healthy and vigorous. Dec. to Mar.

✓ **Baldwin**—Large, roundish; deep bright red; juicy, crisp, sub-acid, good flavor, very productive of fair handsome fruit; one of the most popular varieties in northern states. Jan. to Apr.

✓ **Arkansas Black**—Tree very hardy and thrifty; fruit large, round and smooth; black, dotted with whitish specks; flesh yellow, juicy and of delicious flavor; it is a remarkable keeper. Dec. to Apr.

✓ **Grimes Golden**—Of the highest quality, medium to large size, deep golden yellow, sub-acid, aromatic, spicy and rich; tree vigorous and productive. Jan. to Apr.

✓ **Rome Beauty**—Large, yellow, shaded with bright red; flesh yellowish, tender, juicy, sub-acid; a popular market sort in many sections. Nov. to Feb.

✓ **Stark**—Early and abundant bearer, vigorous grower. Fruit large, roundish; skin greenish yellow, shaped and striped with light and dark red; flesh yellowish, moderately juicy, mild sub-acid, Jan. to May.

✓ **Walbridge**—Fruit medium, handsome, striped, red; flesh crisp, tender, juicy. Tree a vigorous grower; especially desirable in cold section for its hardiness and productiveness. Mar. to June.

✓ **Wolf River**—A handsome apple, originated at Freemont, Wisconsin. Fruit large greenish yellow, shaded with red or crimson, flesh white, half tender, juicy, pleasant, mild sub-acid, with a peculiarly spicy flavor. Jan. and Feb.

✓ **Northern Spy**—Large, roundish, slightly conical, somewhat ribbed; quite covered on the sunny side with dark crimson, and having a pale bloom; flesh white, tender, juicy, spicy, high flavored and delicious, sub-acid; retaining freshness of appearance and flavor until June. The tree is a remarkably vigorous, erect grower, and a great bearer. Requires thinning of the head to admit light and air freely to the fruit. Both leaf and blossom buds open a week later than other varieties. January to June.

✓ **Northwestern Greening**—New, originated in Waupaca County, Wis. Fruit medium to large, averaging from seven to eight ounces each and very uniform in size. Color, greenish yellow, flesh juicy, firm and fine grained, very fine quality and flavor. Tree is very hardy and a thrifty grower, an early and continuous bearer; one of the longest keepers known; with proper care can be kept throughout the entire year. January to June.

✓ **Gano**—Originated in Missouri. Form conical, good size and smooth; deep red shaded on the sunny side to mahogany, very attractive; flesh pale yellow, fine grained, tender, pleasant, mild, sub-acid; is a good shipper and keeper; tree healthy, vigorous and hardy. An annual and prolific bearer. February to May.

✓ **Hubbardston Nonsuch** (American Blush)—Large, round; beautiful yellow, striped and splashed with red; flesh tender, juicy and fine, with agreeable rich flavor hard to distinguish between sweetness and acidity; tree vigorous; bears large crops. November to January.

✓ **Jonathan**—Medium size; red and yellow; flesh tender, juicy and rich; a moderate grower; shoots light colored, slender and spreading; very productive. One of the best varieties either for table or market. November to March.

✓ **Smith's Cider**—Large, handsome, red and yellow; juicy, acid; quality

medium. Moderate grower, and good bearer; succeeds well in south and west, not so well here. November to February.

Spitzenburg, (Esopus)—Medium to large; deep red; flesh yellow, crisp, sub-acid, with a spicy and delicious flavor; tree rather slow grower, requires top working, high culture and good care under which it forms a largespreading tree, a good bearer and deservedly a most popular variety. December to April.

Newtown Pippin, (Albemarle Pippin)—Medium to large, roundish, yellow, very firm, crisp, juicy, with a highly delicious sub-acid flavor; tree a very slow, feeble grower, and not adapted to Western New York and New England; must be top grafted, highly fertilized and well cared for. Has attained its greatest perfection on Long Island and in the Hudson Valley. One of most famous American apples. A very late keeper. November to June.

York Imperial—Medium, white shaded with crimson; flesh firm, crisp, juicy, pleasant, mild, sub-acid; tree vigorous, a good bearer. A popular Pennsylvania variety. November to February.

Yellow Bellflower—Large, yellow with a blush in the sun; very tender, juicy, sub-acid; a beautiful and excellent apple; in use all winter; tree vigorous and a good bearer. November to April.

Wine Sap—The well known deep red market apple of the west and southwest; of medium size and good quality. Productive; keeps from December to March.

Greenville—A seedling of the fine old Maiden's Blush, with all its good points emphasized, but with somewhat larger, more finely fruits that keep much later. They have been kept in an ordinary cellar until June. December to May.

Mammoth Black Twig—A very large and showy dark red apple from Arkansas, where it is largely planted as superior to the Wine Sap. The trees are of strong growth, hardy, and bear profusely. November to April.

Missouri Pippin—Large; handsome, red and yellow; juicy, acid; quality good. Strong grower and abundant bearer. November to March.

White Pippin—Large, creamy yellow, with tender white flesh of pleasantly acid taste. January to June.

Salome—Of medium and uniform size; quality good, retained even until summer. The tree is of good growth, bearing young and annually; holds its fruit well. October to April.

AUTUMN.

Alexander—Large size, deep red crimson; flesh yellowish white, with a pleasant flavor; valuable on account of its hardness, good bearer. Aug. and Sept.

Maiden Blush—Rather large, oblate, smooth, regular, with a fine, evenly shaded red cheek, or blush, on a clear, pale yellow ground; flesh white, tender, sprightly, with a pleasant sub-acid flavor, bears large crops. Aug. and Sept.

Western Beauty.—Large to very large; pale yellow, brightly splashed with red; the light yellow flesh is tender, juicy and melting; one of the most desirable sorts for home and market. October and November.

Wealthy—Few varieties that are at once so hardy and so productive, yield fruit of such good quality, white fleshed, juicy and vinous, it is handsome fruit of medium size, smooth round and deep red. Sep. to Dec.

Autumn Strawberry—A medium-sized apple, beautiful deep crimson, with pleasantly flavored yellowish white flesh. Very hardy and productive. September.

Duchess of Oldenberg—Tree a strong grower, young and abundant bearer, fruit large, yellow streaked, red, rich sub-acid flavor, juicy and good. Best known Russian sort. Sept.

Rambo—Medium yellowish, streaked with dull red and somewhat dotted; mild, tender, good and productive. Oct. to Dec.

A few other autumn sorts: Porter, Fall Wine and Fall Pippin.

SUMMER.

✓ **Benoni**—Vigorous and productive; yellow, nearly covered with dark crimson, tender, juicy. July.

✓ **Early Harvest**—Medium size, round, straw color, sub-acid, productive. July.

✓ **Red Astrachan**—Large, roundish, nearly covered with deep crimson, over-spread with thick bloom; juicy, rich, acid, beautiful, very productive. Aug.

✓ **Yel. Transparent**—One of the most desirable early apples in cultivation; early bearer, frequently producing fine fruit on three-year-old trees; good bearer and hardy; fruit pale yellow, roundish ovate, good size and good quality; skin clear white at first, becoming a beautiful yellow when fully matured; ripens before early Harvest.

CRAB APPLES.

5 to 6 feet, 2 and 3 years.....	\$.15	\$1.50	\$13.00
4 to 5 feet, 2 and 3 years.....	\$.12	\$1.20	\$10.00

Tracendent—Tree immensely productive, bearing after second year. Fruit from 1½ to 2 inches in diameter; skin yellow striped with red; one of the most popular. Sept. to Oct,

HYSLOP CRAB.

✓ **Hyslop**—Fruit large, produced in clusters, deep crimson covered with blue bloom; popular on account of its large size, beauty and hardiness. Oct. to Jan.

Other varieties are: Martha Whitney, Hewes Virginia Cider and Shields.

CHERRIES.

	each	per 10	per 100

4 to 5 feet.....	.20	2.00	17.00
3 to 4 feet.....	.15	1.50	12.00

Early Richmond—Medium size, dark red, melting, juicy, sprightly acid flavor. This is one of the most valuable and popular of the acid cherries, is unsurpassed for cooking purposes and exceedingly productive. Season, June.

English Morello—Medium to large, blackish red, rich, acid, juicy and good, productive. Tree a moderate growth, one of the leading market sorts. July.

✓ **Dye House**—Largely planted for early market, ripening a week before Early Richmond; early, annual bearer, productive, fine size, good quality. June.

✓ **Empress Eugenea**—Large, dark red; flesh juicy, rich. Tree robust and productive. July.

✓ **May Duke**—Large, dark red, juicy and rich; an old and excellent variety, productive. June.

Large Montmorency—A popular market variety; good for all purposes; vigorous grower, very productive. Fruit large, light red; ten days later than Early Richmond.

Reine Hortense—Very fine, large, bright red; juicy, delicious and productive. July.

Gov. Wood—Raised by Dr. Kirtland; one of the best sweet cherries, very large, juicy, rich and delicious. June.

Napoleon—Very large, pale yellow or red; firm, sweet and productive, one of the best. June.

ROCKY MOUNTAIN CHERRY.

4 to 5 feet.....	.20	2.00	16.00

Clapp's Favorite—Very large; yellowish green to full yellow; when fully ripe marked with dull red in the sun, and covered with small russet specks. A splendid pear, ripening before the Bartlett.

Bartlett—Large size with often a beautiful blush on sunny side; very juicy and high flavored. Season, August.

✓ **Flemish Beauty**—Large, beautiful, juicy, melting, rich and fine; good bearer; one of the hardiest and does well nearly everywhere. Sept.

✓ **Keiffer**—Tree very vigorous and ornamental; commences bearing young, exceedingly productive. Its large size and handsome appearance will always cause it to sell readily on the market. Its shipping and keeping qualities are unsurpassed.

Other varieties on our list are: Seckel, Early Harvest, Lawrence, Howell, Koonce, Beurre de Anjou, Osband's Summer, Wilder's Early, Duchess, Garber and Sheldon:

KEIFFER.

PLUMS.

	each	per 10	per 100
5 to 6 feet.....	\$.25	\$2.50	\$20.00
4 to 5 feet.....	.20	2.00	16.00

Lombard—Medium round, oval; violet red; juicy; pleasant and good; adheres to the stone; productive. A valuable market variety; very popular and planted in greater numbers than any variety on the list. Last of August.

Imperial Gage—Fruit large oval, skin pale green; flesh juicy and sweet, rich and excellent. Tree very vigorous and productive. Middle of August.

Bradshaw—Fruit very large, dark violet red, flesh yellowish green, juicy and pleasant; productive. One of the best market sorts.

Shropshire Damson—Medium size, dark purple; productive.

Shipper's Pride—A large, dark purple, oval plum, very showy; often measures two inches in diameter; fine juicy and sweet; valuable for shipping. September.

General Hand—Very large, oval, golden yellow, juicy, sweet and good. Vigorous. A poor bearer. First of September.

German Prune—A large, long, oval variety, much esteemed for drying; color dark purple; of very agreeable flavor. Vigorous. September.

Union Purple—Fruit large, roundish oval, skin reddish purple covered with a thin bloom; stalk short and stout; flesh greenish, vinous, sweet; adheres to the stone. Vigorous. September.

Washington—Very large; clear yellow, marked with red; flesh firm, very juicy and excellent; very popular; productive. Free. Last of August.

JAPAN OR ORIENTAL PLUMS.

"Altogether the Japanese Plums constitute the most important type of fruit introduced into the United States during the last quarter of a century, and they should receive careful tests in all parts of the country."

L. H. BAILEY, Cornell University, Ithaca, N. Y.

ABUNDANCE.

Abundance—The best known Japanese variety. Tree a thrifty, upright grower, very productive; medium to large, oblong, pointed, yellow ground nearly covered with bright red; flesh firm very juicy, light yellow and sweet. August.

Burbank—Tree a vigorous grower; an enormous annual bearer; the best well tested, all purpose variety; fruit medium, large on thinned trees; resembles Abundance; higher color; flesh firm; yellow rich and sugary; ripens one to two weeks after Abundance.

Red June—The best Japan, ripening before Abundance; medium to large, pleasant quality; tree upright, spreading; vigorous and hardy; productive. Early Aug.

Wickson (a new Japanese plum; a cross between Kelsey and Burbank)—The tree grows in vase form, sturdy and upright, yet as

gracefully branching as could be desired, and is productive almost to a fault. The fruit is evenly distributed all over the tree, and from the time it is half grown until a few days before ripening is of a pearly white color, but all at

once soft pink shadings creep over it, and in a few days it has changed to a glowing carmine with a heavy white bloom; the stone is small and the flesh is of fine texture, firm, sugary and delicious, and will keep two weeks or more after ripening, or can be picked when hard and white and will color and ripen almost as well as if left on the tree. Ripens about September 1st.

NATIVE PLUMS.

Wild Goose—Fruit medium, red flesh, juicy and sweet. July.

Pottawattomie—An immense bearer, rather small, yellow ground over-spread with pink. August.

Weaver—Fruit large, purple, with a blue bloom; very prolific; a constant and regular bearer. August.

PEACH.

	each	per 10	per 100	per 1000
5 to 6 feet.....	\$.10	\$1.00	\$8.00	\$70.00
4 to 5 feet.....	.9	.90	7.00	60.00
3 to 4 feet.....	.08	.80	6.00	50.00

ALEXANDER—Standard early sort, medium size, pale, covered with rich tinge of crimson on sunny side; white, tender and juicy. July.

BEER'S SMOCK—A large, yellow flesh peach, an improvement on Smock's Free, which it resembles, ripens a few days later and is a better annual bearer. Last of Sept.

BOKARA No. 3.—Raised from the seed procured from Bokara, Asia; is highly recommended by prominent horticulturists. Tree has stood 20 degrees below zero with but little injury to the tips and produced fair crops of fruit after 21 degrees below. Fruit large, yellow with red cheek, of good quality, perfect freestone; a fine shipper. August.

CROSBY—Medium, roundish slightly flattened, bright

ELBESTA.

yellow, splashed with Carmine; immensely productive and very hardy, flesh yellow. Sept.

CHAMPION—Many specimens have measured 10 inches in circumference. The flavor is delicious, sweet, rich and juicy; skin creamy white with red cheek; handsome, hardy, productive; good shipper. Aug.

ELBERTA—Large, yellow, with red cheek; flesh yellow, juicy, of high quality; exceedingly prolific, sure bearer and hardy; is doing well in all peach sections, north and south. Leading market variety, follows Early Crawford.

TRIUMPH—Earliest yellow flesh peach in the United States. For many years peach growers have been looking for a yellow flesh peach early as Alexander with good eating as well as shipping qualities. This demand is met in the Triumph. Ripens with Alexander, blooms late, sure and abundant bearer; fruit good size, yellow with red and crimson cheek. July.

OLD MIXON FREE—Large, pale yellow, with deep red cheek; tender, rich and good; one of the best. First to middle of September.

SALWAY—Fruit large, roundish; deep, yellow, with a rich marbled brownish red cheek; flesh yellow, juicy, rich and sugary. A new English variety, a good keeper and promising highly as a late showy market sort. Freestone. First of October.

CRAWFORD'S EARLY—This very beautiful and best of peaches is highly esteemed for market purposes. Fruit very large, oblong; skin yellow, with a fine red cheek; flesh yellow, juicy, sweet and excellent. Wonderfully productive and hardy. Freestone. Last of August.

CRAWFORD'S LATE—Fruit of the largest size; skin yellow or greenish yellow, with dull red cheek; flesh yellow; productive. One of the finest late sorts. Freestone. Last of September.

GLOBE—Fruit exceedingly large, globular in form, quite uniform in size, of a rich, golden yellow, with a red blush; flesh very firm, coarse grained but juicy, yellow shaded with a red tinge toward the pit. Succeeds best in the South. Freestone. Middle of September.

STUMP THE WORLD—Very large, roundish; skin white, with a bright red cheek; flesh white, juicy and good. Freestone. Last of September.

Other good varieties in stock are: Balt. Rose, Wheatland, Wonderful, Ford's Late, Mt. Rose, Switzerland, Gudgeon's Late, Morris White, Reeves' Favorite, Foster, Hale's Early and Carman.

APRICOTS.

	each	per 10	per 100

Our 2-year-old grapes are the finest on the market, heavily rooted and graded to the highest standard.

CONCORD—A large purplish black grape ripening about the middle of September; vines remarkably vigorous and free from disease. The most popular market variety.

MOORE'S EARLY—Bunch large, berry large, round, with heavy blue bloom, vine exceedingly hardy. Its earliness makes it desirable for an early market. August.

WORDEN—A splendid large grape of the Concord type, but earlier, larger

POCKLINGTON.

in bunch and berry and decidedly better quality, a very popular sort, planted largely for market. August.

AGAWAM—Bunches large, compact, berries very large, with thick skin, pulp soft, sweet and sprightly; vine vigorous; ripens early. Red.

NIAGARA—Occupies the same position among the white varieties as Concord among the black; the leading profitable market sort; bunch and berries large, greenish white, changing to pale yellow when ripe.

POCLINGTON—Bunch and berries large, when fully ripe a light golden yellow; juicy, tender, sweet with little pulp; vine thoroughly hardy, strong grower free from mildew, productive.

WORDEN—Bunches large, handsome, double-shouldered; berries large sweet, lively, with very little of the foxy or native flavor. Being ten days earlier than Concord, it ripens well in cold localities; vine very thrifty and vigorous, perfectly hardy and a good bearer. It is coming rapidly into repute as one of the leading sorts for general cultivation, ranking in this respect with Concord, to which it is decidedly superior in quality; black. Middle of September.

BRIGHTON—A cross between the Concord and Diana Hamburg. It gives the best of satisfaction. Bunches large, berries of medium size, dark red; flesh sweet, tender, and of the highest quality. Ripens one week earlier than the Delaware. First of September.

DELAWARE—Still holds its own as one of the finest grapes. Bunches small compact, shouldered; berries rather small, round; skin thin, light red; flesh very juicy, without any hard pulp, with an exceedingly sweet, spicy and delicious flavor. Vines moderately vigorous, very hardy and productive. September.

EATON—Black; bunch and berry of the largest size; not quite so early or sweet as its parent, the Concord, but less foxy, pleasant, juicy, with tender pulp; vine very vigorous, healthy and productive. Originated in Massachusetts.

GOOSBERRIES.

	each	per 12	per 100
Downing 2 yr. strong...	.10	\$1.00	\$ 6.00
Red Jacket " "	.20	2.00	12.00
Pearl " "	.20	2.00	12.00

Plant in good rich soil and give a liberal dressing of manure every season; regular pruning every year is essential for the production of fine fruit.

DOWNING—Large, handsome, pale green, and of splendid quality for cooking and table use; bush a vigorous grower and free from mildew. One of the best for both home and for the market; berries very large; very productive.

RED JACKET—An American seedling of large size, smooth, prolific and hardy, of best quality, has been well tested over a wide extent of territory by the side of all the leading varieties, and so far the freest from mildew, both in leaf and fruit, of them all; a wonderful cropper.

PEARL—A new American variety, most prolific gooseberry

yet known; free from mildew; very strong grower; berry a little larger than Downing.

CURRENTS.

	each	per 12	per 100
Cherry 2 year.....	.10	\$1.00	\$ 6.00
Red Dutch 2 year.....	.10	1.00	6.00
White Grape 2 year.....	.10	1.00	6.00
North Star 2 year.....	.15	1.50	10.00
Pomona 2 year.....	.15	1.50	10.00

POMONA—While not the largest, yet is of good size and always attract the buyer on the market. It is a beautiful clear bright, almost transparent, red; has but few and small seeds and is sweeter than any of the common sorts; comes into bearing second year after planting; a record breaker.

NORTH STAR—The strongest grower among the red varieties; should be given plenty of room; bunches average 4 inches in length and are freely produced; hardy, vigorous growth, extra quality and great productiveness.

CHERRY—Berry sometimes more than half-inch in diameter; bunches short, plant very vigorous and productive.

RED DUTCH—An old well-known sort; good quality, berry medium, long bunch; very productive.

WHITE GRAPE—Very large, sweet, of excellent quality, finest of the white sorts; very productive.

VERSAILLAISE—Very large, red; bunch long, of great beauty and excellent quality; one of the finest and best, and should be in every collection. Very productive.

BLACKBERRIES.

	per 12	per 100
Snyder, Early Harvest, Erie, Taylor.....	\$0.25	\$1.50

SNYDER—Extremely hardy, productive, medium size; no hard, sour core; sweet and juicy.

EARLY HARVEST—This is one of the earliest blackberries in cultivation medium size and fine quality; an enormous bearer.

ERIE—One of the best hardy varieties and very productive, foliage healthy and free from rust, fruit large, round in form, good quality, ripens between Early Harvest and Wilson.

TAYLOR—Berries of fine flavor, larger than Snyder; canes of vigorous growth, iron-clad hardness and wonderfully prolific, ripens late.

STRAWBERRIES.

The blossoms of those marked (P) are destitute of stamens and are termed pistillate or imperfect. Those marked with (S) are bi-sexual or perfect. In planting strawberries every third row should be planted with perfect bloomers to insure success.

Brandywine (S)—One of the very reliable fruiting sorts that can be depended on for heavy crops on a variety of soils. Berries very large, broadly heart-shaped, bright red to the center; firm-fleshed and finely flavored. A valuable late berry, 50 cents per 100; \$4.00 per 1000.

Bubach (P)—A sterling old sort that combines many excellent qualities; great and uniform size, rich color and quality, extraordinary vigor and fruitfulness, fine foliage that endures the hottest suns. Season early to medium. 50 cents per 100; \$4.00 per 1000.

SAMPLE.

Crescent (P)—Berries of medium size, rather acid. An extra vigorous and prolific old variety. 50 cents per 100; \$4.00 per 1000.

Gandy (S)—Large and firm berries of uniform size and shape. On heavy, rich loams the plant is a marvel of vigor and fruitfulness. The best shipping, long keeping strawberry, as late as the latest of well-tested sorts. 50 cents per 100; \$4.00 per 1000.

Haverland (P)—Very productive, of medium to large conical berries that are smooth, regular, mildly sub-acid. Pollinated with some highly productive perfect flowering sort, it yields enormous crops and superb berries. Early, and one of the most valuable market sorts. 50 cents per 100; \$4.00 per 1000.

Marshall (S)—Berries very large, handsome, high colored; of extra quality. With high culture the strong, healthy plants produce great crops. Early. 50 cents per 100; \$4.00 per 1000.

Nick Ohmer (S)—A fine fancy market berry and always superb for the table. A giant in size; it is deep red all through, globular, high flavored, delicious. In healthy vigor and fruitfulness is unsurpassed by any other sort. 50 cents per 100; \$4.00 per 1000.

Sample (S)—A strong plant that succeeds well on nearly all soils and yields astonishing crops of uniformly large, fine berries, pointed, conical, rich scarlet, firm and of good quality. A money maker for the market man, and destined to become one of the standard sorts for all sections, it is being planted in immense quantities. 50 cents per 100; \$4.00 per 1000.

Warfield (P)—Great beauty, firmness, earliness, productiveness and vigor make this berry most popular. Ripens with Crescent and is superceeding it for canning, distant shipping and general marketing. 50 cents per 100; \$4.00 per 1000.

Glen Mary (S) Large to very large, sometimes flattened; sweet, rich, delightful. Plants vigorous, extra fruitful of fine berries that hold their size to the end of the season. 50c per 100; \$4.00 per 1000.

Wm. Belt (S) Berries very large, conical, bright red, of good flavor. The plant is strong, healthy, very fruitful. Season medium to late. 50c per 100; \$4.00 per 1000.

Bederwood (S) Very popular throughout the country, and one of the heaviest fruiters of the season among the bi-sexual varieties. Berries crimson, moderately firm, high quality, a splendid pollenizer. Valuable for family and near market. 50c per 100; \$4.00 per 1000.

Clyde (S) Medium early. Berries are crimson color, very large and a good cropper.

Ridgeway (S) A variety of sterling merit. Large, red, rich and aromatic flavor. Good shipper. 50c per 100; \$4.00 per 1000.

Enormous (P) Medium to late, one of the heavy producers. Berries are always large and plenty of them, sound and meaty to the core. 50c per 100; \$4.00 per 1000.

Rough Rider (S) Late. This variety has met with phenomenal success as a late berry wherever planted. 50c per 100; \$4.00 per 1000.

Bismark (S) So closely resembles Bubach in fruit and foliage it would be hard to tell them apart except when in bloom, one being perfect and the other imperfect in flower.

COLUMBIAN—A decided improvement on the Shaffer, of same type and similar color; a strong grower and producer, surpassing Shaffer, which has heretofore stood at the head of these two points, one of the hardiest, passing our last severe winter unharmed, where many other sorts were badly injured. Compared with Shaffer is more solid, is sweeter and of higher flavor.

KANSAS—A new variety of worth, ripens a few days after Eureka and is of large size; canes quite thorny and covered with a thick bluish bloom.

SOUHEGAN—Same as Tyler, early; productive.

GREGG AND OHIO—Two old varieties of merit, too well known to need description.

MARLBORO—Large size, light crimson color, good quality.

CUTHEBERT—A strong hearty variety, very large berries; rich crimson.
